

Tale of Software Engineering from an Operations Perspective

Alireza Arzehgar

July 15, 2026

- Software Development challenges at scale

- Software Development challenges at scale
- Confident Software Development using tests and CI

- Software Development challenges at scale
- Confident Software Development using tests and CI
- Reducing deployment cost using continuous deployments

- Software Development challenges at scale
- Confident Software Development using tests and CI
- Reducing deployment cost using continuous deployments
- Containers for self-deployable and independent units

SWE challenges at scale

- What happens when the software lifespan is not short?

SWE challenges at scale

- What happens when the software lifespan is not short?
- What happens if the team becomes larger?

SWE challenges at scale

- What happens when the software lifespan is not short?
- What happens if the team becomes larger?
- What happens if the product scale becomes larger?

SWE challenges at scale

- What happens when the software lifespan is not short?
- What happens if the team becomes larger?
- What happens if the product scale becomes larger?
- What happens if there are too many changes because of the mentioned challenges?

Confidence with testing

Confidence with testing

- How to test software

Confidence with testing

- How to test software
- Linters and quality checkers

Confidence with testing

- How to test software
- Linters and quality checkers
- Unit test

Confidence with testing

- How to test software
- Linters and quality checkers
- Unit test
- Integration test

Confidence with testing

- How to test software
- Linters and quality checkers
- Unit test
- Integration test
- E2E test

Confidence with testing

- How to test software
- Linters and quality checkers
- Unit test
- Integration test
- E2E test
- Pre/Post submit tests

Confidence with testing

- How to test software
- Linters and quality checkers
- Unit test
- Integration test
- E2E test
- Pre/Post submit tests
- Fitness functions

Confidence with testing

- How to test software
- Linters and quality checkers
- Unit test
- Integration test
- E2E test
- Pre/Post submit tests
- Fitness functions
- Smoke test

Continuous Integration

- Checking code quality

Continuous Integration

- Checking code quality
- Running all kinds of tests

Continuous Integration

- Checking code quality
- Running all kinds of tests
- Building/packaging applications

Continuous Integration

- Checking code quality
- Running all kinds of tests
- Building/packaging applications
- Pushing to Artifactory

Continuous Delivery/Deployment

- How to run an application on servers?

Continuous Delivery/Deployment

- How to run an application on servers?
- Manual deployment challenges

Continuous Delivery/Deployment

- How to run an application on servers?
- Manual deployment challenges
- Containers vs Virtual Machines

Continuous Delivery/Deployment

- How to run an application on servers?
- Manual deployment challenges
- Containers vs Virtual Machines
- Container concepts
